

# ACCÈS AVANTAGE SERIE

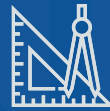

Architectural | visual screen

System designed to **ease**  
circulation around the unit

**Modular design** that adapts  
to the equipment to conceal

**Ajustable** to any  
architectural particularities

Louver-style cladding  
available in different colors

Screen weight completely  
distributed on the roof

Patented system

A unified vision between  
architecture and mecanic.

**The ACCÈS serie, innovating products!**

## DESIGN

G90 galvanized steel structures, assembled with corrosion resistant hardware.

Optimized dimensions following clearances recommended by the manufacturer and the project specifications.

Avantage serie 45° reverse louver-style cladding.

## CLADDING

Made from pre-painted steel sheets with WEATHERXL factory applied coating.

Installed with self-taping metal screw of the same paint finish.

## COLORS

\* The most popular choices between all 42 standard colors offered.

\*\* Visual representation only, samples available on demand.

## CUSTOM DESIGN

Modular structure: the screen can surround multiple mechanical units for a better visual ensemble.

The addition of removable parts, openings and doors is possible to make general maintenance and filter replacement easier.

## FEATURES

**Easy** installation.

**Screen directly attached** to the mechanical unit base frame.

**Not compromising** the unit and roof sealing.

Requires no rooftop anchor point (no drilling necessary).

**Prevent** any water leak risk.

Custom design based on a **standardized and patented structure** that makes the access to any mechanical component on the unit easier.

## OPTIONS

Can be installed with the same facing as the building with our **FLEX serie**.

Acoustical cladding available through our **FLEX Acoustique serie**.
